CHAIRMAN'S MESSAGE

Mr. Rajan Singh Bhandari
Tenure: 2076/06/10 till Present

Citizens Bank had commenced its operation on this date, thirteen years ago, and has been serving the esteemed Citizens of the country - the valued customers of Bank. The Bank brought promise of quality service to banking in Nepal with a dedication and specialization in personal banking service to the business and professional community. On this special occasion I would like to congratulate and thank all the stakeholders of the Bank for working hard and enabling the Bank to reach a height which it has attained today. I would also like to thank Nepal Government, Nepal Rastra Bank and other regulators for their

continued support. For me, being associated with the Bank as CEO for 12 years and about a year in the board, has been rewarding in terms of experiencing both the execution function and strategic function.

As a nation, we are going through an unprecedented difficult time. COVID 19 has brought us and the whole world under its devastating grip. We can only assess the impact of COVID 19 when the economy returns to the normalcy. Dealing with the financial impact across the world will be a tremendous challenge and will need the commitment of all like never before. We, at Citizens Bank, will not leave any stone unturned to become the best even during these troubled times. I believe that with the trust and support of our shareholders, customers and regulators - we will succeed.

आरआइएसके रिस्क अर्थात बैकिङ जोखिमको श्रोत

नारायण राज अधिकारी

हालसालै छिमेकी मुलुक भारतमा एक नाम चलेको बाणिज्य बैंक समस्याग्रस्त भएको समाचारले बैकिङमा चासो राख्ने हर एक व्यक्ति विशेषको ध्यान आकर्षित गरेको छ । नेपालमा पनि विगतमा केही नाम चलेका बैंक तथा वित्तीय संस्थाहरू यसैगरी समस्यामा परिसकेका प्रशस्त उदाहरणहरू छन् । कतिपय बैंक तथा वित्तीय संस्थाहरू समस्यामा परेर बन्द भै सकेका छन् भने कतिपय बैंकहरू आजको दिनमा नामोनिसान नै मेटाएर अरुमा विलय भएका पनि पाइन्छन् । संसारभर विभिन्न समयमा भएका अध्ययन अनुसन्धानहरूले बैंक तथा वित्तीय संस्थाहरू समस्यामा आउनुको

मूल कारण जोखिमको उचित व्यवस्थापन नहुनुलाई देखाएको छ । मुख्य रूपमा कमजोर संस्थागत शुसाशन र कमजोर अनुगमन एवं नियन्त्रण प्रणाली भएका बैंक वित्तीय संस्थाहरूमा यस्ता समस्याहरू आएको देखिन्छ । समस्याग्रस्त बैंक वित्तीय संस्थाहरूको अध्ययनबाट पाइएका मूल कारणहरूलाई के कसरी सहज रूपमा बुझ्न सकिन्छ त भनेर यहाँ अंग्रेजी शब्द रिस्कलाई नै जोखिमको श्रोतको आधार तय गर्न खोजिएको छ । अंग्रेजी शब्द आरआइएसके रिस्क अर्थात नेपालीमा यसको अर्थ जोखिम हुन्छ । यसमा जम्मा चारवटा अक्षरहरू

समावेश छन् । यीनै चारवटा अक्षरहरूलाई महत्वपूर्ण तत्वको रूपमा स्वीकार गर्दै जोखिमको मूल कारणको विश्लेषण गर्ने कोशिस गरिएको छ । रिस्कमा समावेश भएको पहिलो अक्षर आरबाट रेगुलेटोरी कम्प्लायन्स, जसको अर्थ हुन्छ नियमाकीय निकायबाट निर्देशित मार्गदर्शनहरूको अनुपालना । अर्थात नेपालको सन्दर्भमा नेपाल राष्ट्र बैंकबाट जारी मार्गनिर्देशनहरूको अक्षरशः पालना गर्नुपर्ने दायित्व बैंक वित्तीय संस्थाहरूको हुन्छ । यदि पालनामा उदाशिनता देखाइन्छ भने जोखिमको मुख्य कारण यहीँबाट शुरू हुन्छ । दोश्रो अक्षर आईबाट इन्फ्लुएन्स बाई बोर्ड, अर्थात सञ्चालक समितिको हस्तक्षेप । बैंक वित्तीय संस्था सञ्चालनका क्रममा दैनिक कार्य सम्पादनमा हस्तक्षेप हुने गरि बढि भन्दा बढि नाफा कमाउनको लागि सञ्चालक समितिबाट उच्च व्यवस्थापनका कर्मचारीलाई दवाव दिने गरिएको छ भने त्यहाँ उच्च जोखिम हुने गर्छ । तेश्रो अक्षर एसबाट सिस्टम प्रोसेस एण्ड प्रोसिडर, याने कि बैंक सञ्चालनमा गर्नुपर्ने विभिन्न क्रियाकलापहरूको लागि आवश्यक संयन्त्र र प्रणालीको विकास गरि प्रक्रियागत मार्गनिर्देशनको निर्माण गरिएको छ कि छैन यसैबाट जोखिमको मूल्यांकन गर्ने हो । संस्थाको काम कारवाहीको तौरतरिका व्यक्तिवादी छ कि प्रणालीवादी छ यदि व्यक्तिवादी छ भने उच्च जोखिमको श्रोत हुन सक्ने कुरालाई समावेश गरिएको छ । चौथो अक्षर केबाट नलेज अफ इम्प्लोई वर्किङ्ग इन बैंक, अर्थात बैंक वित्तीय संस्थामा कार्यरत कर्मचारीको सम्बन्धित क्षेत्रको ज्ञान अनुभवको स्तर के कस्तो छ । बैंक वित्तीय संस्थामा कार्यरत उच्च र मध्यम व्यवस्थापनका कर्मचारी लगायत शाखा व्यवस्थापनमा कार्यरत कर्मचारीहरूको सम्बन्धित क्षेत्रको ज्ञान अनुभवको अवस्था के कस्तो छ यसका आधारमा उनिहरूले गर्ने कार्य सम्पादनको जोखिमको स्तर तय गर्न सकिन्छ ।

रिस्कको चारवटा अलग अलग अक्षरहरूले बैकिङमा उत्पन्न जोखिमको मूल कारणहरूको प्रतिनिधित्व गर्दछ । निम्माकीय निकायले बैंक वित्तीय संस्थाहरूमा हुन सक्ने विभिन्न जोखिमहरू जस्तै कर्जा जोखिम, सञ्चालन जोखिम, बजार जोखिम, व्याजदर जोखिम लगायत अन्य जोखिमहरू न्यूनीकरणको लागि आवश्यक मार्गनिर्देशनहरू दिएको हुन्छ । उक्त निर्देशनहरूको मर्मलाई आत्मसाथ गरेर आवश्यक संयन्त्र प्रणालीको विकास गरि अक्षरशः पालना गर्ने हो भने धेरै हदसम्म जोखिमको व्यवस्थापन हुने कुरामा दुई मत हुन सक्दैन । विगतमा जुन जुन संस्थाहरू समस्यामा परे तिनिहरूले निर्देशन पालनाको अवज्ञा गर्दा संस्था नै बन्द गर्ने अवस्थामा पुगे ।

हालै भारतमा भएको समस्याग्रस्त बैंकको परिस्थिति पनि उस्तै सुनिएको छ । नेपालको सन्दर्भमा कुरा गर्ने हो भने निम्माकीय निकायले यति धेरै मेहनत गरेर जोखिम व्यवस्थापनको सुक्ष्म मार्गनिर्देशनहरू जारी गरेको छ कि जसको पालना गरेमात्र पनि काफि छ । संस्थागत शुसाशनको पालना कसरी गर्ने, सञ्चालन जोखिम न्यूनीकरणको लागि के गर्ने, कर्जा जोखिम न्यूनीकरणको लागि के गर्ने जस्ता कैयौं मार्गनिर्देशनहरू जारी गरिसकेको छ जुन अन्तराष्ट्रिय अभ्यासहरूभन्दा धेरै माथि छ । बैंक वित्तीय संस्थाहरूले यदि नियमाकीय निकायले दिएको निर्देशनहरूको गलत अर्थ लगाई काम गरिरहेका छन् भने ढिलो चाँडो मात्र हो समस्याग्रस्त हुने कुरामा कुनै शकै हुन सक्दैन । तसर्थ जोखिम न्यूनीकरण गर्ने हो भने मर्म अनुसार पालना गर्नु नै श्रेयस्कर हुन्छ ।

केही बैंक वित्तीय संस्थाहरूमा सञ्चालक समितिबाट दैनिक क्रियाकलापहरू जस्तै कर्जा लगानी, कर्मचारी भर्ना अनि सरुवा बढुवा जस्ता विषयमा हस्तक्षेप रहेको कुरा यदाकदा सुनिने गर्छ । बास्तवमा कुनै पनि संस्थाको सञ्चालक

समितिको गठन गर्ने भनेको नै उक्त संस्थाको रेखदेख गर्नको लागि हो । उनिहरूको मुख्य काम भनेको संस्था सञ्चालनको लागि आवश्यक निति नियम बनाउने र सो निति नियम कार्यान्वयन गर्नको लागि उच्च व्यवस्थापनलाई खटाउने र सो अनुसार भए नभएको हेर्ने हो । तर निति नियम नबनाउने यो गर त्यो गर भनेर दैनिक क्रियाकलापमा उच्च व्यवस्थापनलाई मौखिक आदेश दिने अनि बढि भन्दा बढि नाफा कमाउनको लागि अनैतिक दवाव दिने काम गरिएमा त्यस्ता संस्थामा संस्थागत

शुसाशनको चरम दुरुपयोग भई अधिक जोखिम हुने कुरामा दुईमत हुन सक्दैन । बैंक वित्तीय संस्थाहरूलाई दीर्घकालिन रूपमा जोखिम रहित तरिकाबाट चलाउने हो भने संस्थागत शुसाशन पालनाको कुनै विकल्प हुन सक्दैन । संस्था सञ्चालनको लागि सञ्चालक समितिबाट प्राप्त निति निर्देशनहरूको कार्यान्वयनको लागि आवश्यक संयन्त्र र प्रणालीको विकास गर्नु पर्छ । उचित प्रक्रियाको अभ्यास गरिनु पर्छ तवमात्र जोखिमको न्यूनीकरण गर्न सकिन्छ । सञ्चालक समितिबाट मौखिक आदेश लिने अनि कामकारवाही पनि कुनै प्रक्रिया विनै हचुवाको भरमा गर्ने हो भने संस्थामा व्यक्ति हावी हुने खतरा रहन्छ । व्यक्ति हावी भएको संस्थामा सञ्चालन जोखिम अधिक रहन्छ । कुनै प्रणाली प्रक्रियाको अभ्यास नभएको संस्थाको कार्य सम्पादनमा एकरूपता हुँदैन । त्यस्ता किसिमका संस्थामा काम गर्ने कर्मचारीहरू सँधै के गर्ने के नगर्ने भन्ने बारेमा निश्चित हुन सक्दैनन जसकारण विभिन्न किसिमका जोखिमहरू उत्पन्न हुन्छन र दीर्घकालमा संस्था नै बन्द पनि हुन सक्छ । तसर्थ के काम कसरी कसले गर्ने भन्ने प्रणाली र प्रक्रियाको विकास गर्नुपर्ने कुरालाई यसले जोड दिएको छ ।

कुनैपनि संस्थामा जतिसुकै राम्रो प्रणाली र प्रक्रिया बनाइएको भएपनि त्यसलाई कार्यान्वयन गर्ने भनेको दक्ष एवं अनुभवि कर्मचारीले हो । यदि कर्मचारीको दक्षता पुगेन भने जोखिम न्यूनीकरण हुन सक्दैन । किनभने प्रणाली र प्रक्रियाको मर्म बुझेर त्यसलाई कार्यान्वयन गर्ने भनेको कर्मचारीले नै हो त्यसले आफ्नो काम गर्न सक्दैन । वर्तमान परिपेक्षमा बैकिङमा खास गरि मध्यम तह र शाखा व्यवस्थापन तहमा अनुभवि एवं दक्ष कर्मचारीहरूको अभाव चुलिँदै गएको सुन्न पाइन्छ । कर्मचारीलाई दक्ष एवं अनुभवि बनाउनको लागि बजारमा विभिन्न किसिमका तालिमहरू उपलब्ध छन् त्यसमा लगानी गर्न कुनै कन्जुस्योई

गर्नु हुँदैन । दक्ष कर्मचारीको अभावमा जोखिम न्यूनीकरण हुन सक्दैन । भनिन्छ रिस्क अर्थात जोखिम यत्र तत्र सर्वत्र छ चाहे व्यक्तिगत जीवनमा होस या व्यवसायीक कार्यक्षेत्रमा । व्यवसायीक जोखिमको उचित व्यवस्थापन गर्न सकिएन भने यसले संस्थालाई तहस नहस पारेर छोड्छ । तसर्थ

आरआइएसके रिस्कको सहि अर्थ बुझेर यसको पालना गर्न सकिएको खण्डमा जोखिमलाई निमित्तयान्न नै त होइन कम गरि संस्थाको भविष्य उज्ज्वल बनाउन सहज पुऱ्याउने देखिन्छ ।

Covid-19: A wound or scar, which would heal or last forever

Dasrath Shah

Before COVID-19, the banking industry was experiencing an unprecedented period of growth and prosperity. Now, there is a global scare. It is not just about Nepal. We are beginning to see the early economic impact of the Coronavirus outbreak. The novel coronavirus (COVID-19) outbreak is breaking all the records day by day as the virus continues to spread. It is creating waves around the world's every sectors. Most of the nations across the world are governing quarantine measures restricting the open human physical movement, shutdown of almost every industries and business activity resulting to which supply chains around the globe have been interrupted. However, the full impact of such interruptions is yet to be felt more. In this pandemic time, even as a layman observer, it looks world will never be the same again and it would take much time to get back into normal stage.

As all of us continue to be locked down in our homes, the million dollar question that keeps ticking in our mind is "WHAT LIES AHEAD OF US?" Every day we watch-read-listen several news from various news platforms on how behaviors are likely to change and consequently business models, financial system, global markets at current Covid and post Covid phase. Touchwood in Nepal, the Covid pandemic scenario has been entered into second stage and just pray that the third stage won't proceed by the grace of "PASHUPATINATH".

Even in Nepal, although the large number of players would be injured due to this pandemic, the expectation is that this stage will pass over in coming 2-3 months' timeframe and the whole nation would be back to normal business progressively after this difficult phase. The Nepalese economy is heavily relying on remittance, aid, and tourism and which is bound to suffer no doubt. Due to a nationwide lockdown to respond to the pandemic, domestic economic activity has been severely affected and is in a state of deadlock. Besides, we are more helpless to debt stomachache. To temper its impact, the Government of Nepal and central banks have already started seeking help from international financial institutions like IMF and the World Bank whose bilateral and multilateral surveillance could possibly fit our interest towards the best possible financial solutions.

Our country is a capital starved economy, both debt and equity. Financing our Nepalese future growth through equity is not a practicable outline where leverage could play very important role in making sure of potential growth as expected somehow. With the global economic downturn, there is a substantial risk of ripples of bankruptcies and lay-offs of the

employees and daily wage workers. And Nepal is no exception to that—these happenings can not only threaten the recovery of the national economy but also likely threaten the fabric of society as well. To mitigate such bearings, it's time to think "outside the box". NRB should take extensive measures to address this crisis by applying new policies & strategies and providing subsidies to loan portfolio for those borrowers and sectors that have been hard hit by the severe, but temporary, shock. It is important to recognize this and have institutions and policies in place to provide this leverage and not treat debt as evil, especially in the current pandemic time.

In these testing times, it is important for Government, NRB and policy makers to take steps to underwrite risk when the existing financial intermediaries balk at doing them. In my personal opinion as "JAAN HAI TOH JAHAN HAI" NRB along with Nepal GOVn should designate and select existing financial intermediaries as 'COVID-CARE' institutions & Pump in capital into these institutions and give them a specific mandate to address issues the system is grappling with. There could be

one such institution for each customer-business segments Corporate, SME & retail. NRB could govern and compliance them via hosting new specific policy, dispensations and exceptions for this specific portfolio of assets viz Corporate, SME & retail. These institutions should be able to provide 'RE-START' capital and additional leverage to enable customers-business to revert to pre-Covid state.

Alongside, some consumer relief strategies can be offered unilaterally (such as reductions in lending rates or elimination of penalty fees), that could be considered on a case-to-case basis. There could be defer in mortgage and other loan repayments for extended periods of time, discount facility in early payments of EMI, EQI & Installments, access to cash from fixed-term savings accounts without early termination fees, temporary increase in credit card borrowing limit, elimination of cash advance fees, simplified digital personal loan application process, increase in cash withdrawal limits and so on.

All types of financial intermediaries have been performing a specific function as guided and it is important that any policy dispensation is applicable in the same manner for all to ensure that any disruption does not fuel contagion in the business eco-system that we're dreaming off. All of this assumes that economic activity could restart later this year, but we have to also consider more adverse scenarios. Under more severely strained circumstances, we will have to rethink our playbook substantially. Some banking systems might have to be recapitalized or even restructured. That might be the effective way forward to heal the wound somehow that has been rotting these days and now in a breathless state on a ventilator.

Importance of Deposit to Banks and the entire Banking Industry

Roshan Manandhar

Needless to say, the banking system in an economy is analogous to the heart in the human body structure and the finance/capital it provides can be associated to blood that circulates in it. As long as blood remains in circulation, all the organs in the body will remain sound and healthy. If blood is not adequately supplied to any organ or part of the body, then that part will be starved of nutrients and oxygen and will become useless.

Similarly, if finance is not provided to any economic sector, it will suffer and that sector will eventually fail. However, the ability to provide the relevant financing is dependent on the ability of the banks to mobilise adequate amount of deposits in the economy from local sources as well as other foreign sources of funding viz. remittance, exports etc.

Financial institutions provide the system through which savers deposit their money and borrowers can access those resources. The process by which deposits are transformed by the banking sector into real productive activity is the core of financial intermediation. Banks ensure that the efficient mobilised deposit funds are efficiently transformed into productive capital.

Deposit mobilisation is therefore a key first step in the financial intermediation process. Banks simply cannot function without deposits from savers in the economy. Domestic deposits traditionally provide a cheap and reliable source of funds for development, which is of great value in developing countries like us. Domestic deposits are of even greater importance in our economy which has difficulty raising capital in international markets.

When banks rely less on deposit funding and rely more on open market funding, this is widely seen as negative for financial stability. Open market funding requires that the bank continually rolls over treasury bills issued by Central Banks; bond issues and renews its borrowings from other financial institutions continuously. In general, these bond issues have proved to be less stable than customer deposits, and reliance on open market funding makes the banks' liquidity position more vulnerable to external shocks.

In an effort to mobilise deposits in an economy, banks develop various forms of products that can be enjoyed by the clients. The most important deposit products are those that make it easier for clients to turn small amounts of money into "useful lump sums" enabling them to smooth consumption and mitigate the effects of economic shocks. These are typically provided by banks in the form of Fixed Deposits and Savings Accounts.

Any decline in amount of deposits at the banks, raises important questions about whether the banks will be able to remain successful and meet the credit needs of the economy in future. Banks will experience a temporary liquidity dips due to a decline in the amount of deposits. The most important step for banks in addressing this problem would be to develop strategies that are

consistent with the needs of the savers in the economy. When the deposit base in the economy shrinks, banks will respond in a variety of ways:

- Banks will become more aggressive in maintaining their local base of depositors and focus more on better customer relationships and service.
- Banks will offer incentives to depositors in the form of higher interest rates and other attractive conditions in order to retain depositors on their books.
- Banks will look for other funding sources and will compete more directly for market based funds. In this respect, call deposits of other FIs and Interbank Lending/Borrowing becomes more important.
- The banks also look at ways of creating new funding sources and better ways to manage banking assets.

Hence, it is important to always keep in mind that every time one makes a deposit with the bank, he is providing part of the lifeblood for the economy. Putting the little resources that people have under the pillow in their homes implies that they are depriving a struggling household or a firm somewhere in the economy of a vital lifeline.

Treasury Risk Management

Suzata Bajracharya

"Treasury Risk Management assumes to be important as the nature of treasury activity is such that profits are generated out of market opportunities and market risk is present at every step."

There are two crucial requirements for effective treasury risk management; having a documented treasury policy that clearly defines which risks are to be managed, and how they are to be managed; and having sufficient mechanism to implement and monitor the policy in daily treasury operations. The treasury department is manned by the Treasury Front Office, Treasury Middle Office and Treasury Back Office. A treasury middle office set up, independent of the treasury unit, responsible for risk monitoring, measurement, analysis and reports directly to the top management for controlling purpose. The unit provides risk assessment and essential market information to Asset Liability Committee (ALCO) and is responsible for daily tracking of risk exposures as well as inspects daily operations in the treasury department to ensure compliance of internal or and regulatory policies.

Today, treasury risk management activity has become increasingly important as volatility in financial markets increases. Effective risk management requires systematic and reasonable identification, measuring, monitoring, controlling and evaluation of risks inherent within the treasury. The risk is usually associated with losses but risk does not necessarily imply losses. Hence identification of risk and prioritize these risks based on various criteria like the probability and severity of the risks is the first step of management of Treasury risk. Treasury Risk Management relates to the management of risks arising from liquidity, foreign exchange, interest rate and Equity prices.

Liquidity Risk

Liquidity risk is the risk of not having sufficient funds to meet its financial commitments in a timely manner. The two key elements of liquidity risks are short term cash flow risk and long-term funding risk. The short-term cash flow risk includes the risk of failure to manage fund for daily operations. The long-term funding risk includes the risk that loans may not be available when the business requires them.

Liquidity is dynamic according to business as well as market conditions and can be expected or unexpected. It arises the need of maintaining adequate liquidity to cover all liabilities. Hence the first step is to ensure the information on the amount of liquidity available and forecast of how much will be available in the future. This information can then be used for minimizing risks through maintaining sufficient liquidity buffer, monitoring maturity mismatch of assets and liabilities (Gap Analysis) in different time bucket and applying corrective action to fix any mismatch. Effective liquidity risk management helps in minimizing borrowings by funding shortfalls in one place with any available surpluses in others, through inter-bank lending operations.

Market Risk

Market Risk is the risk of loss resulting from changes in market variables such as interest rates, foreign exchange rates and Equity prices. Market risk is unavoidable but not unmanageable. Market risk covers a number of exposures. The assessment of exposure to market risks must include

all bank activities that are sensitive to changes in market conditions. The Basel Committee on Banking Supervision defines banks' market risk as "the risk of losses in on- and off-balance sheet risk positions arising from movements in market prices."

Interest rate risk: The potential loss due to movements in interest rates is known as Interest rate risk. The risk factors that are in the direct relation with the interest rate for which the bank has positions that are sensitive to the interest rate, within the balance sheet and also outside. It is known that the bank has a long position when the assets are bigger than the liabilities with fixed interest rate (same type). This position

is favorable to the bank in the periods of interest rate decreasing, as it benefits from the fixed level of interest rate for the assets.

Similarly, in short position (assets smaller than liabilities of the same type) increase in interest rate benefits the bank as the level of the interest rate stays fixed at a lower level compared with the market trend.

There is risk that value of Assets and Liabilities as also Net Interest income get affected due to movements in interest rates. The mismatch in cash flows or repricing dates of assets and liabilities expose bank's NII. The management of interest rate risk is also called asset liability management.

Foreign Exchange Risk: The risk that bank may suffer loss as a result of adverse exchange rate movements during the period in which it has open position is known as Foreign currency risk. The potential loss due to changes

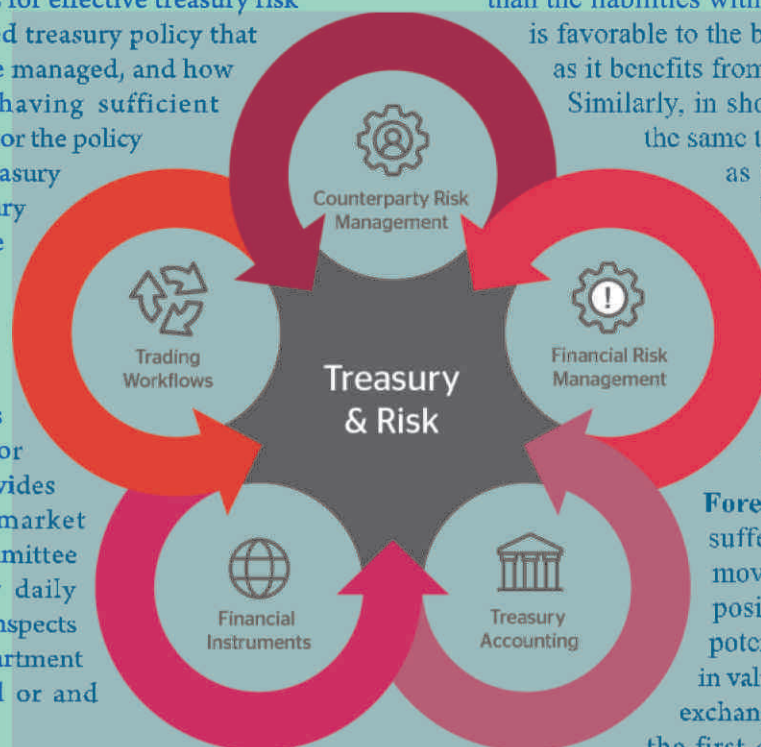

in value of a bank's assets or liabilities resulting from exchange rate fluctuations. It has three components; the first component is the exposure due to banking transactions developed with assets and liabilities that are sensitive to risk. The second is the exposure associated to the operations

of conversion from one foreign currency to another and the last one is the exposure that undertakes the influence of the foreign currency rates fluctuations upon the bank's value.

Exchange Risk can be measured, monitored and reviewed with the help of historical value at risk calculation and stress testing. Foreign Exchange Risk can be managed by setting appropriate limit for open positions, using hedging tools like forwards, futures and options.

Equity Risk:

The risk of potential loss to the . bank due to changes in equity prices of bank holding equity portfolio is called Equity risk. The share price are the equilibrium prices that settle the market based on the rate between the demand and supply. When the rate for demand and supply is unbalanced, the prices register variations that express the volatility of the price. Any negative changes in stock price either leads to a loss or reduction in investment's value. Equity risk can be measured, monitored and reviewed with the help of historical value at risk calculation and stress testing. Equity Risk management can be done by setting prudential exposure limits and frequently revision of investment portfolio. "What gets measured gets managed." Risk that can be quantified should be measured to determine their potential impact to the bank. An internal model for measuring market risk, based on statistical techniques are value at risk and stress testing. Effective risk management is much more than just applying financial models; it requires the application of judgment and experience not only to know how to use the models appropriately but also to appreciate the strengths and limitations of the models and to know when to substitute one model with another model. Value at Risk (VaR) is a statistic that measures and quantifies the level of financial risk within a bank, portfolio over a specific time frame.

This metric is most commonly used by commercial banks to measure, monitor and review the extent and occurrence ratio of potential losses in their institutional portfolios. It determines maximum probability of loss occurrence with certain confidence level. The data that are the input in VAR based model comprise information about the bank's positions and the prices, the volatility and their risk factors. It is a simple concept, easy to understand and communicate. Historical method of Value at risk assumes that history will repeat itself, from a risk perspective. Historical simulation involves constructing a distribution of hypothetical daily changes in the value of portfolios based on two sets of inputs; Historical observation of daily changes in rate and Portfolio values. The model considers trust level of 99% for determining the maximum probability of loss occurrence in the portfolio.

Formulas for calculation of Value at Risk based on Historical method

1 Day V@R at 99% Confidence Level = PERCENTILE (rang of return in %, 1%)

Maximum V@R for next 10 days = 1Day V@R x 10

Stress testing is a key risk management technique which evaluates the potential effects of extreme market events. Market Risk Management performs several types of stress testing to capture the variety of risks. This enables the bank to simulate market movement scenarios in order to analyze the impact of abnormal market conditions on its profit and loss. Risk factors including interest rate, exchange rate and equity price can be evaluated using stress testing. There are two steps in stress testing; developing scenarios involving probable market events and evaluating the portfolio under these scenarios. Stress testing has ability to assess subjectively extreme events, could give this information. If we consider an extreme enough scenario, then it is possible to predict the loss for any portfolio.

After we have identified and measured the risks inherent within the treasury, we need to consider an appropriate course of action to be taken. Should we hedge the risk? How much of the risk should we hedge? How should we hedge the risk? What is our risk appetite? These are some important questionnaires considered in the process of controlling the risk. Risk management should be carried out with policies and procedures that are approved by risk management committee. The treasurer may use different tools and market products to hedge different risks. For example, foreign exchange forwards and swap deals for foreign exchange risk. Different tools might be better for different market environments.

The effectiveness of the hedging tools and strategies need to be tested and evaluated over time. The internal controls should be reviewed regularly to ensure the compliance of internal and regulatory policies. In conclusion, Treasury Risk management remains at the heart of most treasury operation, and it is helpful to place the treasury risks within the overall risk chart of the bank. Since, bank is prepared to meet the known events, such as due date for a money market loan, or for a deposit, however there are numerous unforeseen market events which translates the treasury risk into balance sheet risk of the bank.

COVID-19 and Aftermath

Suraj Kumar Neupane

The world including our country is witnessing a very severe shock with the rise of Corona Virus 2019. As this is continuing with growing numbers, it is very difficult to predict the date when the containment will take place and incalculable are the affects accordingly. However, it is certain to exert negative influence in various spheres of the economy and the psychology of people all over the world.

Since, Nepal being a developing country, will be much affected in remittance sector as the country receives most of the foreign currency from employment in middle east, Europe ,etc. due to layoffs and delayed salary payments. All the nations providing employment have been locked down due the pandemic and the on-going projects and industries have also slowed down or closed due to the world wise supply chain disturbance. There are more than 5.5 million national working in foreign countries. One cannot imagine the consequence if only half on the people are returned: will our country be able to provide them with minimum employment while neglecting so many already unemployed human resources in the country?

Being a tourist destination where maximum investment in the field of tourism, have been made in recent years, with the prioritization of this sector by the government. This pandemic has locked the entire tourist, domestic and international, in their homes and they cannot be imagined to come for refreshment for a long time. During the period, the business people may not be able to tolerate the financial loss and certainly seek help from the government.

With the slacking of income inflow through remittance, the consumption pattern will also be harmfully hit, ultimately reducing transaction in the economy. This will slow down the demand in the market and the production will decrease reducing the Gross Domestic Product index. Since, the factories many not run in full capacity, the fixed cost will increase per unit product cost of the goods and the factories will be closed for not enduring competition, in turn, the imports will rise, however in high cost, as there are also likely to be disruptions due to shortages of imported raw materials and spare parts. The BOP and trade deficit will push the economy back to many more years.

Borrowers and businesses face job losses, slowed sales, and declining profits as the virus continues to spread around the world. Non repayment or delay in repayment due to the slowdown in business, decreasing demands of loan will be in the rise. It can be predicted that investors will hold and review long planned projects. Their priority, psychologically, will be making money in the short run rather than funding in the long term and high net-worth projects like tourism, aviation, entertainment, etc. On one hand, there will be lessening credit supply in the economy and the other hand, continuous operational cost will decrease profitability of the financial sector.

Apart from the economic aspects, the psychology of the people will also be impacted. It is unknown when Corona virus will come in control and when will the lockdown be withdrawn. Even if the lockdown is loosen or withdrawn, fear in the minds of the people for possible transmission will restrict them come closer in the society. The parties, social and religious functions, various events, etc. all will be hampered causing social and physical distance further. Even worse will be the impact in the mental education and mental health of the students who have been distant from school/colleges for a long time and still counting.

With growing decline in business and profitability of the going concerns, falling revenue collection by the government, and the rising fear of contamination with the virus amongst the citizens, the priority of the government may shift to short term programs rather than long term: the government will focus in increasing budget in the sectors of health, education, SMEs, agriculture, etc, by reducing budget in infrastructural project. There may be continuity in the existing projects, but no fund will be laid for new planned projects like before. Thus, the country will take much time in reshaping its current economic status.

डिजिटल बैंकिङ अवसर र चुनौती - सन्दर्भ कोभिड १९

सुयस कुमार पौडेल

अहिले विश्व कोभिड १९ को महामारीले ग्रस्त छ । यसका कारण लाखौं मानिसहरूले ज्यान गुमाउनुपरेको छ भने करोडौं मानिसहरू प्रत्यक्ष वा अप्रत्यक्ष रूपमा प्रभावित भएका छन् । यसले निम्त्याउने आर्थिक प्रभाव अहिलेनै यकिन गर्न नसकिए पनि विश्वव्यापी रूपमा ठूलै असर पार्नुका साथै थुप्रै रोजगारीहरू गुम्ने निश्चित छ । संयुक्त राष्ट्र संघले सन् २०२० को आर्थिक बृद्धिदर पहिले प्रक्षेपण गरिएको २.५% बाट घटेर १.२% मा झर्ने अनुमान गरेको छ । अझै खराब परिस्थितिमा यो ०.९% सम्म हुन सक्नेछ । त्यस्तै अन्तराष्ट्रिय श्रम संगठनको अनुमान अनुसार विश्वव्यापी रूपमा १.२ अर्ब मानिसहरू बेरोजगारी को उच्च जोखिम मा छन् भने १९ करोड ५० लाख मानिसहरूको आउने त्रैमास भित्रमा रोजगारी गुम्ने खतरा छ । रेमिटेन्समा आश्रित नेपाल जस्तो देशले यसका कारण ठूलै मूल्य चुकाउनुपर्ने देखिन्छ । बैंकिङ क्षेत्रको व्यापार एवं नाफालाई पनि यसले प्रभाव पार्नेछ । कोरोनाका कारण विशेष गरी पर्यटन, होटेल, खाद्यान्न तथा अन्य साना उद्योगहरू बढी प्रभावित हुनेछन् । अन्य थुप्रै उद्योग एवं कलकारखाना समेत कुनै न कुनै रूपमा प्रभावित हुने छन् । बैंकका ऋणहरूको यस्ता खालका व्यापारमा समस्या उत्पन्न हुन जाँदा उनीहरू समयमै ऋण तिर्न असमर्थ हुनेछन् । यस्तो अवस्था लामो समय रहिरहे एवं राज्यबाट सही समयमा सम्बोधन हुन नसके समग्र बैंकिङ प्रणाली लाई नै असर गर्न सक्नेछ । बैंकहरूले आर्थिक प्रभावलाई व्यवस्थापन गर्नुका साथै कर्मचारी र ग्राहकको सुरक्षालाई पनि उत्तिकै ध्यान दिनुपर्नेछ । यसले हाम्रो काम गर्ने शैलीलाई पनि परिवर्तन गर्न सक्दछ । विदेशमा कतिपय बैंकहरूले घरबाटै गरिने काम (Work from Home) लागु गरेको सन्दर्भमा नेपालमा पनि ग्राहकहरूसँग प्रत्यक्ष सम्पर्क गर्नु नपर्ने केही निश्चित कार्यहरूमा यसलाई अवलम्बन गर्न सकिन्छ ।

कोरोना भाइरसको प्रभावसंगै पारम्परिक बैंकिङ प्रणालीको बिकल्प खोजिने पक्का

छ । विश्व स्वास्थ्य संगठनले Contactless Payment प्रयोग गर्न र सकेसम्म कागजी नोट प्रयोग नगर्न सल्लाह दिएको परिप्रेक्ष्यमा मोबाइल बैंकिङ (Mobile Banking), ईन्टरनेट बैंकिङ (Internet banking), क्यू आर कोड (QR Code), अनलाईन कार्ड कारोबार (Online

Card Transactions) आदिको प्रयोग बढ्ने निश्चित छ ।

हालैको लकडाउन (Lockdown) मा बैंकहरूले एक अर्काको बिचमा ATM कारोबार गर्दा शुल्क मिनाहा गर्नुका साथै मोबाइल बैंकिङको कारोबारमा पनि कुनै शुल्क लिएनन् जसले गर्दा डिजिटल कारोबार गर्न ग्राहकहरू अझै प्रेरित भए । यसले गर्दा ग्राहकहरूलाई आफ्नै बैंक सम्म पुग्नुपर्ने बाध्यता रहेन । यो समयमा डिजिटल कारोबारमा निस्क्रिय थुप्रै ग्राहकहरू समेत सक्रिय भई कारोबार गर्न पुगे । विशेष गरी मोबाइलमा टपअप (Top UP) गर्ने, ईन्टरनेटको शुल्क भुक्तानी गर्ने र एक अर्काका खातामा रकमान्तर (Fund Transfer) गर्ने कार्यमा उल्लेख्य बृद्धि भयो । त्यसैले यस्ता सुविधा लिने ग्राहकहरू भविष्यमा अझै बढ्ने नै छन् ।

यसले गर्दा बैंकहरूलाई Digitization तर्फ अघि बढ्न दबाब पर्नेछ । हाल कायम परम्परागत बैंकिङ मोडेललाई प्रविधिको प्रयोग गरी आधुनिकरण गर्नुपर्ने छ । यस्ता प्रक्रिया र प्रविधिको बिकास गर्नुपर्नेछ जसले बैंकको संचालन खर्च (Operating Income) मा कमी ल्याउनुका साथै बैंकिङ सुरक्षा (Banking Security) बढाउने, त्रुटीहरू घटाउने (Reduction of Error), ग्राहक आधार (Customer Base) बढाउने र ग्राहकहरू लाई बैंकिङमा सहज पहुच पुऱ्याउने कार्य गर्नेछ । तसर्थ हाल प्रयोगमा रहेको Utility payment, Fund Transfer आदि जस्ता सेवा मात्रै होइन, कर्जा (Loan), निक्षेप (Deposit), जोखिम व्यवस्थापन (Risk Management), बजार व्यवस्थापन (Marketing) आदि जस्ता कार्यहरूलाई पनि Digitize गर्नुपर्ने आवश्यकता देखिन्छ । यसका लागि बैंकहरूले सूचना प्रविधि (Information Technology) मा लगानी बढाउनुपर्ने छ भने आन्तरिक प्रक्रियाहरू (Internal Processes) को पुर्नसंरचना गर्नुपर्नेछ । ग्राहकहरूको संलग्नता बढाई उनीहरूलाई Digital Banking तर्फ आकर्षित गर्नुपर्नेछ ।

Leadership in Times of Crisis

Subarna Budhathoki

In the time of crisis, it is very difficult for business leaders to know exactly where to begin with. In the last few weeks, individuals and businesses have shifted their attention to protection mode, and focus have drastically shifted from global marketplace to their nationalities, their communities, families, employees and other major stakeholders. With social distancing models and state imposed lockdowns imposed worldwide, we are seeing radical and drastic changes in behavioral patterns of various stakeholders of business. With so many changes in a short span of time, what can business leaders do to serve and grow their business, mitigate the inherent risk and at the same time take care of their workforce?

1. Keep yourself open for all the options

When we face with uncertainty, we as leaders might be so focused on present situation that we might even overlook the broader possibilities facing us. We might be so much caught in status quo, it's more likely that we make rash decisions and let go productive opportunities. A relevant example could be the increased digital service offerings provided by Chinese Banks have driven customers to digital channels and have protected the welfare of both customers and their employees. Major automobile companies throughout the world are producing ventilators and other medical equipments necessary to cope with the crisis.

2. Present with empathy and be transparent

Everyone is vulnerable right now. Hence, empathy is must. While the business is dealing with the outbreak, it's equally important to understand that every stakeholder is also affected in many ways. A business leader's response to such situations defines who they are as a leader. Nepali Banks, for example had decided to waive the fees charged while transacting in ATMs of all Banks. Such actions would have long lasting influence in the eyes of customers. The alleged black-marketing of thermal guns and other medical accessories (face masks, gloves, sanitizers etc.) by leading businesses might be adversely impacting their long term business.

3. Service adaptation

Since we are facing a prolonged lockdown for maybe weeks to come, with general public being told to stay at home; it becomes more difficult for Companies. Most of the businesses in Nepal across all industries have long adopted a B2C model with face to face interaction being its major part, we are facing added difficulty. Thus, business leaders today need to adapt to the changing business reality. Bhatbhateni Superstore, for example has started home delivery of groceries. Big mart has collaborated with Daraz for free home delivery of grocery items above NPR 1,500 with Kathmandu valley.

4. Associate your Company with good

People do remember the generosity shown by Companies during bad times. It could be providing food to needy people, waiving charges and penalties, free services, paying salaries to staff members even when the Company's revenues are minimal. Few beverage companies worldwide are now manufacturing hand sanitizers. People do recognize the contributions made by businesses in the long run.

5. There always are possibilities

New business avenues and possibilities do always exist and leaders are judged on their ability to take the company forward in uncertain times. They also need to plan for life beyond these uncertain circumstances. Leaders need to lead in new ways with confidence of taking the business forward.

The brutal humanitarian effects COVID 19 brought itself with are surely going to be accompanied by the long term business and economic consequences. All the businesses seem to be focusing on how to remain afloat now and after it passes away. It seems tempting to think about present business survival; however business leaders need to think about future and be prepared for the economic fallout in days to come.

TESTING THE MANKIND - PANDEMICS

Neetika Ghimire

Scientists and medical researchers have for years have differed over the exact definition of a pandemic (is it a pandemic, or an epidemic), but one thing everyone agrees on is that the word describes the widespread occurrence of disease, in excess of what might normally be expected in a geographical region. Cholera, bubonic plague, smallpox, and influenza are some of the most brutal killers in human history. And outbreaks of these diseases across international borders, are properly defined as pandemic, especially smallpox, which throughout history, has killed between 300-500 million (30 to 50 Crore) people in its 12,000 year existence.

Beginning in December 2019, in the region of Wuhan, China, a new ("novel") corona virus began appearing in human beings. It has been named Covid-19, a shortened form of "corona virus disease of 2019." This new virus spreads incredibly quickly between people, due to its newness - no one on earth has an immunity to Covid-19, because no one had Covid-19 until 2019. While it was initially seen to be an epidemic in China, the virus spread worldwide within months. The WHO declared Covid-19 a pandemic in March, and by the end of that month, the world saw more than a half-million people infected and nearly 30,000 deaths. The infection rate in the US and other nations was still spiking.

Some of prominent Pandemics of the past are given below:
HIV/AIDS PANDEMIC (AT ITS PEAK, 2005-2012)
 Death Toll: 36 million (3.6 Cror)

Cause: HIV/AIDS

FLU PANDEMIC (1968)

Death Toll: 1 million (10 Lac)

Cause: Influenza

ASIAN FLU (1956-1958)

Death Toll: 2 million (20 Lac)

Cause: Influenza

FLU PANDEMIC KNOWN AS SPANISH FLUE- (1918)

Death Toll: 20 -50 million (2 - 5 Cror)

Cause: Influenza

SIXTH CHOLERA PANDEMIC (1910-1911)

Death Toll: 800,000+ (8 Lac)

Cause: Cholera

FLU PANDEMIC: ASIATIC FLUE OR RUSSIAN FLUE (1889-1890)

Death Toll: 1 million (10 Lac)

Cause: Influenza

THIRD CHOLERA PANDEMIC (1852-1860)

Death Toll: 1 million (10 Lac)

Cause: Cholera

THE BLACK DEATH: BUBONIC PLAGUE (1346-1353)

Death Toll: 75 - 200 million (7.5 - 20 Cror)

Cause: Bubonic Plague

PLAGUE OF JUSTINIAN (541-542)

Death Toll: 25 million (2.5 Cror)

Cause: Bubonic Plague

ANTONINE PLAGUE (165 AD)

Death Toll: 5 million

Cause: Unknown

So, we can say that Pandemics have always been occurring around the globe, since unfathomable times, in the recorder history of mankind. But what should be our approach and reaction at a tome when we are living in the midst of a real-time Pandemic?

Well, first of all we mentally accept the reality that we are living within a real time CRISIS. Once we start accepting the reality, we can keep our mind cool, and we do not panic. Next, we should strictly adhere to the advices given to us by the State authorities, because these advices are actually suggested by the appropriate authorities (Like WHO guidelines, Health and Pandemic experts etc). These advices should be followed religiously. And last, but not the least, remain OPTIMISTIC, and never

loose HOPE. I would like to quote Maxwell Maltz who says "Close scrutiny will show that most 'crisis situations' are opportunities to either advance, or stay where you are." world is filled up with stories of tremendous resilience and courage where people and nations rose up victoriously from a situation of hopelessness. Here are a few true happenings that happened around us on this globe. What goes behind these stories is an innate desire to be

victorious by using Motivation and Determined Efforts.

"We all know that American Allied Forces bombed Nagasaki and Hiroshima of Japan on 6th & 9th August 1945. If experts were to be believed, after the total destruction in 2nd World War, Japan had NO future. BUT the same Japan in just 3 decades or so, made US cry at the market place.

Judaism diffused mainly through relocation diffusion during the Jewish Diaspora. In 722 BCE, Israel was conquered by the Babylonians and the Jewish people moved out of Israel and into Egypt and Babylon and over a period of centuries they migrated to several countries around the globe. Thrown out of their own land, they never lost their hope and ultimately in 1947, they regained their land back, known to us as modern day Israel. Today, although they are surrounded by Arabs (staunch enemy of the Judaism) in every direction, they have become a matchless world power. If the experts were to be believed, Israel should have been wiped out from the world map by the Arabs, but the fact is different.

The Corona Crisis is no different. This pandemic situation is just a phase which will be over after sometime. I do not have any doubt that we will defeat the Corona with utmost resilience, positivity, and complete determination. NEPAL'S Economy will bounce back with a greater impetus. The past few weeks have been unlike anything we have ever seen, and we are all adjusting to a new reality that seems anything but normal. But to get into a normal situation we should all support the government, stay home and stay safe. Together we can stand again and together we can work hard to raise the economy.

HISTORY OF PANDEMICS

Need of Digital Human Resource Management

Sanjeev Jha

It is said that the dimension of doing business is changing day by day and one of the important landscape seen in recent times is the growth of technology and digitization in working procedures. The business implementing digitization is leading the world today while those involved in traditional way are finding hard to sustain.

The current situation of COVID-19 as pandemic there by leading to the lockdown situation has also proved digitization as an important tool for current crisis management for both doing business and HR management. Therefore, I believe digitization is no longer a choice but it has become necessity in doing business particularly in Banking where the concept of cashless and paperless has emerged more in developing countries and Nepal is not far from it. In course of going cashless, facilities like internet banking, mobile banking with multiple facilities like interbank fund transfer, merchant payment, utility bill payment and many more and online facilities like online account opening facilities has emerged. Those days are not far when people won't have to visit banks for doing

transaction. It has been observed that the organization which is strongly equipped with technological tools are managing their HR and business efficiently and the same scenario is seen during the present crisis created due to pandemic COVID19. The current crisis has also taught the importance of digitization in

Human Resource Management. **"we had already implemented few concept of digitization in employee management functions like payroll processing, leave and attendance management, compensation management, performance management etc. Apart from that we had also implemented digitization and technology use (to possible extent) in recruitment process like conducting interview, organizing monthly meeting with Staff of the Bank"** but the current crisis has made us aware that the time has come for implementing digitization in overall Human Resource Management. It includes managing digital workforce that consists major percentage of employee, digitization of regular manual work and making employee digitally literate. The digitization in working procedures can make organization easily implement the concept of **"work from home"** which has become necessity in current crisis situation as well as in the days to come. Organizations like Google and many more are more concerned on output rather than the way the task is accomplished i.e whether employee works from home or from office is not the matter of concern and the same concept can be implemented for certain department wherever possible. Some organization believes that to implement digitization involves huge cost but I believe its just myth; digitization may include significant cost in short run but it helps to reduce cost greatly in long run like space management (required for filing and record keeping), safety of records, cost reduction by going paperless and performing departmental function with less manpower thereby decreasing personnel cost as well, reduction in cost involved in hiring due to less manpower requirement which ultimately also reduce the challenge of high turnover that is prevalent in banking industry. With integration of technology, I believe it's the time for implementing digitization in human resource management system not only to have impact on revenue generation but to have experience creation with digital human resource and most importantly managing the crisis situation like current pandemic in an efficient manner. However organization should not blindly invest in digitization just for digitization but it should be inline to the need of the Banks too. I think even after the current lockdown situation is over, we can implement **work from home** for staff twice or thrice a month on rotation basis so that staff shall be mentally prepared for such situation if required and can implement it during the crisis like we are facing today. The concept of work from home can be applied by organizations in systematic way i.e providing certain sessions for login from home to the staff where they can work and HRD can track record of projects completed by the concerned staff from home.

Protein Supplements:

Garima Acharya

This morning I had constructive argument with my friend about the "protein supplements" that he takes every day after following fitness schedule. As I was concerned about the downside of the supplements whereas he sees the sunny side of it. I was informed by my networks that taking supplements is not good for our health because it contains harmful chemicals which create health risks in human body so I shared my talks with him and tried to convince him taking natural protein contained foods instead of taking supplements dose every day. Actually he denied me; asked me to share researched materials as a proof. He had a point as I shared rumored things said by my associations. But then, I thought of doing some sort of research in the topic "Protein supplements" so as to find safe side as wells as downside that can help both of us to reach to an agreement. Protein is a vital dietary component containing amino acids that acts as a source of energy for the regulation of the body's cells, tissues and organs and it play's major functions in the growth and repair of tissues as it can be obtained from foods such as meat, fish, eggs, milk and legumes. Although we consume proteins in our regular diets, many athletes takes their diet with protein containing supplements such as protein powders, sports bars and meal replacements drinks. It has been found that protein supplements provides benefits, such as a longer shelf life than whole food sources and cost effective as well. Different types of protein contains varying amount of amino acids; there are total twenty amino acid to make proteins and are categorized as essential and non-essentials. Essential amino acids must be obtained from the diet as body cannot synthesize the amino acid. Non-essential amino acids are easily synthesized so they are categorized as non-essentials. Moreover, not all protein sources contains same amount of amino acids; animal sources of protein contains all essential amino acids and are complete source of protein whereas plants protein miss essential amino acid. Protein sources containing large amount of essential amino acids generally have higher protein quality. Mostly players, fitness followers' takes protein supplements such as whey, casein, soy and egg proteins that contains all high quality proteins and are easily available in market.

Every one of us are aware of necessity of proteins in our daily lives. However, do we know the right amount of protein to take per day? As per the research done by World Food Organization; The Dietary Reference Intake is 0.8 grams of protein per kg of body weight or 0.36 grams per pound which is amount to 56 grams per day for the average sedentary man and 46 grams per day for the average sedentary woman. Generally, sedentary man/woman eats natural foods containing protein whereas athletes and gym enthusiast's people takes protein supplements such as protein shake or powder for maintaining muscles and body structures. Do you think it's good for health to take protein powder/shakes? It is said that people who works out or are engaged in massive physical exercises need to exceed the protein quantity and they generally takes supplements to see the quick consequences in the proper functioning of their body. According to the research done by Medical News Today, it shows that people engaged in excessive training must exceed the protein intake recommendation i.e. Ranging from 1.4 to 2.0 g per kg of body weight. Moreover, 2013 research reviews shows that taking excessive consumption of protein may damage the kidneys and liver and as well as affect the body's bone and calcium. Therefore it is recommended to measure the nutritional needs before using protein powders and as well as people who finds challenging to get enough protein from their regular diets could consider taking protein supplements.
